

TECHNOLOGY SOLUTIONS

Construction Instruments Machine Control Solutions

Wagner offers complete technology solutions that help maximize your productivity and profitability. We provide a variety of Trimble Navigation and Caterpillar Accugrade guidance systems, both for sale and rent. No matter your industry, be it earthmoving, mining, or precision agricultural we have your solution.

Contractors, miners, landfill operators, and farmers are discovering the competitive advantage that Wagner Technology Solutions provide. We not only represent the best systems available, but also provide the skilled support staff you need to deploy and maintain the right technology solution for your business.

Wagner's Technology Solutions group also offers remote machine condition monitoring solutions. These systems enable you to know where your assets are, while at the same time giving you insight into your machine's health and operating conditions.

Technology Solutions Rental Terms and Conditions:

Rates listed are for a minimum of one week or billed on a 176 hour four week month. In all cases installation and training are not included in rental rate and will be billed separately. Pricing for installation and training will vary based on individual need and configuration. Based on availability, scheduling of installation may take up to five business days.
